

►►► Fact Sheet

Passive Solar Heating and Cooling

Building orientation (continued)

Careful orientation of your building on the site will maximise energy efficiency and minimise costs.

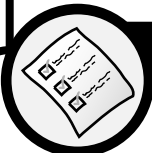

QUICK TIP!

Locate living areas towards the northern end of the home and sleeping areas to the southern end.

ENVIRONMENTAL BENEFITS

Heating energy savings will result in reduced costs and valuable resources will last longer.

ASK YOUR BUILDING PROFESSIONAL

- Does the building design take the best advantage of the site's North - South alignment?
